Laurie Needham, City of Seattle  
Teri Nielsen, WSACC  
Tim Schellberg, WASPC  
Joan Smith, WSP  
Bob Lopez, WSP  
Harvey Queen, CTED

Paul Taylor called the meeting to order at 1:30 p.m.

**Progress Report Toward Integration Blueprint**

John Broome provided a handout which included status reports and background information for WACIC/WASIS, Standardized Rap Sheets, PCN Implementation, and Live Scan Implementation:

- The WACIC/WASIS rewrite has been completed. The project came in ahead of schedule and under budget.
- With the completion of WACIC/WASIS a more uniform rap sheet has been detailed. The WSP is continually working with the FBI to eventually establish a uniform rapsheet for both in-state and out-of-state rap sheets.
- PCN implementation is almost completed. By the end of February over 90% of the state will be using PCN to track fingerprint events to dispositions of cases.
- Live Scan Implementation is also going very well. There are 22 jurisdictions that now have live scan devices that will be able to transmit information to the WSP.

**Full involvement of local jurisdictions in JIN - Dennis Hausman, DIS**

Dennis has been visiting the counties and cities throughout the state for the last several months.. In other efforts to keep local jurisdictions informed of the work of the JIN there is now *JIN Community Update* located on the website. These efforts have opened up

doors to communication for involvement and coordination of the counties, cities, and state

#### **Launch of OMNI - Don Price, DOC**

Don stated the contract was awarded to IBM Global Services and that Global is certified as level 3 in Capability Maturity Model. A kick-off was held November 30<sup>th</sup>, and the project started immediately. The first phase of the project has a cost estimate of 7.3 million dollars. They anticipate that this will ultimately be an eight year project, which will include many more phases. The title of the system is OMNI, which stands for Offender Management Network Information.

#### **Electronic Judgement and Sentencing Program - Tom Clark, OAC**

Tom stated the program is scheduled to begin implementation sometime in the year 2000.

#### **Statewide Jail Reporting System - Dennis Hausman, DIS**

WASPC has completed the statewide jail feasibility study to determine how to have all jails report information to a central repository that will be maintained by WASPC. WASPC has also drafted legislation that would require jails to send information to them. The legislation has a caveat that requires the information transmission only if appropriate funding was available so that it would not add any costs to the local jails. Larry Erickson and others have met with Senator Gorton to pursue federal funding options.

#### **Summary Offender Profile - Dennis Hausman**

Dennis advised that with the completion of WACIC/WASIS rewrite, the time has come to start working towards the Summary Offender Profile. A sub-committee will be convened to start working on the Summary Offender Profile with hopes that the federal government will fund this effort. Named to this committee was Steve Clem, Bev Hempleman, Terri Neilson, and Jim Wilcox. A motion was made and passed unanimously for Dennis to have limited authority to begin work in January 2000 to articulate a proposal to the Department of Justice for the funding of the Summary Offender Profile.

#### **NASIRE/SEARCH Integration Architecture - Dennis Hausman, DIS**

The architecture document funded through NASIRE/SEARCH originated with a smaller grant to NASIRE, DOJ now has another grant to amplify on this work. The CJIA needs to review the architectural direction and get feedback to Dennis by January 3<sup>rd</sup>, COB.

#### **Enterprise funding proposal (DOJ) - Dennis Hausman, DIS**

At the last Justice Information Committee (JIC) meeting, there was discussion around a concept dealing with enterprise funding. Several months ago, the Department of Justice asked that the JIC develop a plan to create a new type of funding scheme. The basis of this should be that all funding from the Department of Justice should go towards projects that enhance justice integration within this state. This concept may also be applied to state funded projects. Dennis asked for volunteers from the Executive Committee to serve on this task force. Dennis will also be asking for volunteers via the *JIN Community Update*.

**Radio Interoperability Study - Dennis Hausman, DIS**

The Justice Information Committee, at the request of the Information Services Board, has asked the Washington State Patrol to develop a decision package requesting funds for a radio interoperability study.

The minutes from September 20<sup>th</sup> were approved.

Next meeting is scheduled for February 15, 2000.

Meeting adjourned.
